SEC-8

SKILL-7:

Aim: Process Synchronization and Child Process Monitoring Using waitpid().

To Retrieve PATH Variable, Parse Search Directories, Locate Executables, Verify Permissions, Handle Missing Commands, Test Command Resolution

PROCEDURE :

1. Compilation :

```
siddinapujith07@DESKTOP-FdHCAIT:~$ mkdir skill7
siddinapujith07@DESKTOP-FdHCAIT:~$ cd skill7
siddinapujith07@DESKTOP-FdHCAIT:~/skill7$ nano path_search.c

Code:

```
#include <stdio.h>
#include <stdlib.h>
#include <string.h>
#include <unistd.h>
#include <sys/wait.h>
#include <sys/stat.h>

int main(int argc, char *argv[])

               WEXITSTATUS(status));
    }

    printf("Parent process completed.\n");
}

return 0;
}

```

Observation :

- The PATH environment variable was retrieved successfully.
- The PATH was divided into separate directories and searched.
- The required executable command was located successfully.
- Execute permission was verified using access().
- A child process was created using fork().
- The parent process waited for the child using waitpid().
- Missing commands were detected and an error message was displayed.

Result :

The program successfully implemented **process synchronization using waitpid()** and **command resolution using the PATH variable**. It correctly searched for executables, verified permissions, executed valid commands, monitored the child process, and handled missing commands successfully.
